

CHANDRA KIRAN CHALLAMALASETTI

Available start date: Immediately | Location: 63108, MO (Willing to relocate) | Email: chandrakiranchallamalasetti@gmail.com | +14695799618 | [LinkedIn](#)

SUMMARY

Data Analytics graduate with **3+ years** of experience transforming complex datasets into reliable data pipelines across enterprise environments. Delivered **zero-defect ETL migrations** across **four platforms** (Informatica, Teradata, Oracle, Unix), specializing in EDW integration, Bteq scripting, and end-to-end deployment lifecycle management.

INDUSTRIAL EXPERIENCE

Cognizant

Programmer Analyst

Hyderabad, India

July 2022 – December 2023

- **Ensured 100% data reconciliation across 162K+ records by executing end-to-end ETL pipelines across 4 integrated platforms in EDW migration**
- Enhanced **zero-defect releases** across **four platforms** (Oracle, Informatica, Teradata, Unix) by leading ETL pipeline migrations from development to production in a multi-platform EDW environment
- Processed **162,000+ source records** by validating and executing end-to-end ETL workflows with full staging and target layer verification
- Achieved **100% data integrity** across **four production schemas** by managing Informatica workflow deployments and DDL/DML script executions with DBA collaboration
- Ensured **100% record reconciliation** across **three source tables (418 to 161,860 rows)** by validating data integrity across source, staging, and target layers
- Minimized data movement errors by designing and executing Bteq scripts for staging-to-target, and full run-stat verification and monitoring
- Avoided deployment risk with the creation of structured implementation and rollback plans, with full recoverability for all elements of the EDW pipeline

Cognizant

Programmer Analyst Trainee

Hyderabad, India

February 2022 – June 2022

- **Streamlined 3-layer EDW data pipeline - Integrating 2 source systems, - Automating staging-to-target loads with Bteq and KSH scripts**
- Designed ETL-based pipelines to combine the Oracle and Teradata sources into a **3-layer** structured and scalable data flow EDW architecture
- Built **Bteq and KSH scripts** implementing **two load strategies** (Truncate & Load, update else Insert) for staging-to-target data movement
- Architected specific ETL logic for two scenarios: New and existing tables in both **Dev and Test** environments, and managed the migrations
- Developed three tables at the same time, including new table builds and schema changes, on Dev and Test servers.
- Implemented best practices with Teradata in critical areas, including data protection, reporting readiness, and optimizing query performance.
- Delivered **Unit Testing docs and Implementation Plans** supporting full ETL deployment lifecycle from development to production release

ARCH Pharmalabs Limited

Internship

Sangareddy, India

June 2019 – May 2020

- Supported **Data Collection**, organization, and updating across various systems to keep data accurate and consistent.
- Facilitated Data entry, validation, and documentation processes based on organizational data standards.
- Worked with colleagues to **Create Reports** and contributed to business data and information.

Academic Projects

Lab Abnormalities as Predictors of Chronic Disease

August 2025 – December 2025

- Structured a **cloud-based ETL pipeline** processing patient lab reports, enabling chronic disease risk identification within **2 minutes per report**
- Applied **ML clustering and risk modeling** to generate automated health summaries, ensuring **100% data integrity** and privacy compliance

CORE COMPETENCIES

Tools & Technologies: Oracle SQL, Teradata, Informatica PowerCenter, IICS (Cloud ETL), Microsoft Power BI, Microsoft Office (Word, Excel, PowerPoint), Linux (PuTTY), Jira Software, Hugging Face (Basic – NLP tools)

Programming & Data Skills: SQL (Data querying & manipulation), R (Statistical computing & analysis), Python, Data Cleaning & Data Preparation, Statistical Analysis & Reporting, Data Visualization, Database Management

Data Engineering / ETL: ETL Validation, Data Integration & Data Pipelines, Data Mapping & Transformation, Production Support

AI & Prompt Engineering: Vertex AI (Prompt Design & Generative AI), Google Cloud Platform (Agent Studio), Large Language Models (LLM)

Soft Skills: Cross-functional Collaboration, Multitasking & Prioritization, Diligence, Written & Verbal Communication

EDUCATION

Saint Louis University

Master of Science in Analytics (Focus: Data analysis)

Saint Louis, MO

January 2024 - December 2025

Coursework: Data analysis, Data Visualization, Statistical Analysis, Data Management, Predictive analytics, Business intelligence, Analytical modeling, Decision-making analytics, Project management, Data Cleaning

SRM Institute of Science and Technology

Bachelor of Technology in Mechanical Engineering (Focus: Mechanical Design)

Kattankulathur, TN, India

June 2018 – May 2022

Coursework: Engineering Graphics and Design, Mechanics of Solids, Manufacturing Technology, Process Planning and Cost Estimation, Quality Control, Database Management Systems, Statistical Methods & Data Analysis, Operations Research, Numerical Methods & Computation
